

Save \$\$\$ and Book Acres Today – Hensall Co-op is offering a \$2.00/ac savings on application costs when booked by April 30th, 2022.

An application of fungicide at the proper timing can help manage both yield and quality in your corn crop:

- 15+ bushels increased yield
- Up to 50% reduction in DON
- Protection from late season leaf diseases such as Tar Spot

Northern Locations:

- Rogator with 120 ft boom & 73" clearance (Hensall)
- Rogator with 100 ft boom & 73" clearance (Seaforth)

Southern Locations:

- John Deere with 120 ft boom & 76" clearance (*Greenway*)
- Hagie with 120 ft boom & 76" clearance (*Aylmer*)
- New Holland with 120 ft boom & 76" clearance (*Forest*)

Program Highlights:

- Program is now for 30 inch row corn spacing
- Booked application acres are GUARANTEED by Hensall Co-op to be sprayed prior to taking on "in-season" acres
- Includes Hensall Co-op Field Marketer staging the proper timing
- Field Marketers will follow-up in season to discuss if a Western Bean Cutworm insecticide is warranted
- All equipment is equipped with proper clearance and proper nozzles to ensure precision application

For more information contact your Local Hensall Co-op Field Marketer or one of our Hensall Co-op Locations!
