

## Installing a Mobile Version of FieldTrace®

**iPhone or iPad users:** Install the app from the link on the webpage. If this is the first time that you are loading FieldTrace®, you will have to “trust” the app using the option in the settings page of your device.

Go to Settings> General> Device Management and select ‘FieldTRAKS’. Then select Trust to verify the app. This is required because the app is in development mode. These instructions also appear on your screen when you download the app.

*Note:* some older iOS devices may no longer be able to update to the operating system version required to run FieldTrace®.

**Android users:** You can use the link mentioned above or simply go to Google Play on your phone or tablet and search for ‘FieldTrace’ (all one word) and install the app from there. Trusting the app in settings is not required on Android devices however your device may ask you to verify that you do want to download the app.

If you need assistance with FieldTrace® contact your Field Marketer or Walt Vermunt by [email](#) or at [519.709.0551](tel:519.709.0551)
